who are
JOHUD

WELCOME..

"Established in 1977, the Jordanian Hashemite Fund for Human Development (JOHUD) is the oldest and largest non-profit, non-governmental organisation dedicated to promoting rights-based, sustainable human development in Jordan.

With our network of **51 Community Development Centres** located throughout the country, we are at the forefront of building a brighter future for those living in under-served, poor, and remote communities. JOHUD provides sustainable support that empowers individuals to work with their neighbours, strengthen their communities and secure access to the resources they need to achieve healthy and fulfilled lives."

JOHUD SYSTEM

This system aims to provide and facilitate the processes of establishing the activities of the Jordanian Hashemite Fund for Human Development (JOHUD), which enables the user to display the data And the information he needs easily without referring to tired records and paper references and contributes to showing the necessary reports .

DATA-ENTRY

SOME FEATURES

Full Control

Super Admin can control all data and system informations(add admins and Data Entrants...)

Reports

Comprehensive reports on projects, activities and budget

Security

A secure system that allows every data-entry operator to access only his or her information.

DESCRIPTION

- Super Admin:

It has the powers to modify all the contents of the site,
Here are the permissions that it appears for him to create the basis for system information:

Admins	**Workplaces**	**Data Entrants**	**Project Types**

Type of Reports	**Timeline Types**	**Performance indicators**

- Admins:

they have the powers of approval and rejection of projects and activities added, and modified.

Projects	**Activities**
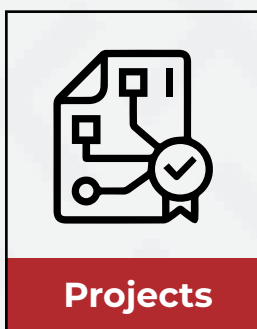

- Data Entrants:

They can add projects and activities related to it.

SAMPLE PROCESS

Steps to create a project and its activity and extract the report

AJAX USED

I uesd ajax to prevent reload page after submit the data to send it to database

ref: https://www.webscodex.com/2020/07/insert-form-data-using-jquery-ajax.html
ref: https://www.youtube.com/watch?v=eO0A6meYwJw&t=21s

```html
<script type="text/javascript">
    $(document).ready(function (){
        $("#form").on('submit', function (event){
            event.preventDefault();
                Swal.fire({
                    title: 'Are you sure?',
                    text: "You won't be save this!",
                    icon: 'warning',
                    showCancelButton: true,
                    confirmButtonColor: '#3085d6',
                    cancelButtonColor: '#d33',
                    confirmButtonText: 'Yes, save it!'
                }).then((result) => {
                    if (result.isConfirmed) {
                        $.ajax({
                            type: "POST",
                            url: "/dashboard/workplaces",
                            data: $("#form").serialize(),
                            success: function (response){
                            Swal.fire(
                                'Saved!',
                                'Your Place has been Recorded.',
                                'success'
                            )
                                location.reload(true);
                        },
                        error: function (error){
                            printErrorMsg(error.responseJSON.errors);
```
